

Microsoft 365 & Office 365 Migration

Cloud computing has improved the efficiency and effectiveness of communications among organizational users. At ATS, we help you chart out a path for migrating to the cloud smoothly and securely, with full access to Office 365 plus web-based services for email messaging and online collaboration. Through comprehensive Consulting, Implementation, and Management, we ensure that you have all aspects of Office 365 covered.

Consulting

TECHNOLOGY ASSESSMENT

Review the entire organization's technology infrastructure and business strategy to determine whether Office 365 is an effective option for your organization.

PLAN SELECTION

Work with your IT and management teams to select the Office 365 plan that best fits your organization's requirements, goals, and objectives.

COST ESTIMATION

Provide per-user and long-term cost estimations to help you simplify technology budget planning.

STRATEGY KICKOFF

Collaborate with your team to develop a comprehensive cloud migration path with criteria, timeline, and step-by-step process and training plan that covers your organization's needs.

Implementation

SEAMLESS, NON-DISRUPTIVE MIGRATION

Smoothly migrate your organization's emails, files, and other applications to Microsoft's secure cloud, without downtime or disruption.

QUICK DEPLOYMENT

Implement both Office 365 messaging and on-site Exchange server to meet your goals and infrastructure requirements.

Management

PARTNERSHIP

Our partnerships with Office 365 management platform providers bring you a centralized management console for easy monitoring, reporting, and troubleshooting.

SUPPORT

Just a phone call or email away, our help desk support responds to your request and resolves issues timely to minimize downtime and inefficiencies.
