

Why Opt for ATS SIEM Services?

Enhanced Security Posture

Equip your organization with highly skilled 24/7 analysts and SOC managers utilizing advanced SIEM systems for comprehensive threat management.

Integrated Big Data and Threat Intelligence

Combine big data analytics with sophisticated threat detection and monitoring, ensuring rapid, precise information on security threats, including severity and attacker identity.

Comprehensive Threat Detection

Achieve centralized threat detection and incident response across diverse environments - cloud, applications, and on-premises infrastructure.

Rich Analytics and Log Management

Create a robust compliance and forensic investigation environment with intelligent dashboards and detailed analytics.

Real-Time Alarms and Expert Analysis

Elevate threat detection with prioritized alarms, bolstered by expert analysis to effectively minimize false positives.

Stringent Compliance Assurance

Safeguard sensitive data with advanced reporting capabilities for standards like PCI DSS, HIPAA, NIST CSF, and more.

Continuous Security Monitoring

Our cybersecurity team continuously monitors SIEM solutions, receiving intelligence updates to analyze and counteract emerging attack types, exploits, and vulnerabilities.

Comprehensive SIEM Features

- **Asset Discovery:** Identify and manage network assets for enhanced security visibility.
- **Behavioral Monitoring:** Monitor network behavior to detect unusual activity patterns.
- **Intrusion Detection:** Deploy advanced systems to detect and respond to intrusion attempts.
- **Real-Time Information:** Gain immediate insights into security events for rapid response.
- **SIEM Event Correlation:** Analyze and correlate events to identify potential security incidents.
- **Vulnerability Assessment:** Conduct thorough assessments to identify and address security weaknesses.

Empower Your Organization with
State-of-the-Art SIEM Capabilities

**American Technology Services:
Providing Best in Class Cybersecurity.**
