

Specialized Support for Legal, Regulatory, and Needs

ATS' digital forensics team provides specialized support for legal professionals, compliance teams, and insurance providers facing complex challenges. Our services help validate claims, uphold regulatory standards, and drive informed decisions throughout the investigative process.

Regulatory Compliance
Investigations

Adhere to industry standards and regulatory requirements while preparing comprehensive responses for audits or inquiries.

Ransomware
Investigations

Analyze and resolve ransomware incidents by uncovering root causes, securing evidence, and assisting with ransom negotiations and system recovery.

Litigation Support

Provide court-admissible findings, expert witness testimony, and detailed reports to strengthen legal cases.

Insurance Claims
Analysis

Support insurance companies by investigating incidents such as ransomware attacks, data breaches, and fraud to validate claims and assess impact.
